Biomedical Measurement and Intelligent Health Monitoring Systems Research Group

The research areas of this group are:

- (i) Signal analysis of human cardiovascular and cardiorespiratory signals for early detection of pathology.
- (ii) Compression and encryption of cardiovascular signals for health monitoring applications.
- (iii) Wireless heath monitoring using ZigBee wireless networking.
- (iv) Non-invasive measurement of mental stress using physiological signals.

Contributors:

- (i) Rajarshi Gupta, Electrical Engineering, Applied Physics, University of Calcutta.
- (ii) Kaushik Das Sharma, Electrical Engineering, Applied Physics, University of Calcutta.
- (iii) Jayanta K Chandra, Dept. of Electrical Engineering, Govt. Engg. College, Purulia, West Bengal.
- (iv) Palash Kundu, Dept. of Electrical Engineering, Jadavpur University, India.
- (v) Sumitra Mukhopadhyay, Dept. of RadioPhysics & Electronics, University of Calcutta.
- (vi) Dr. Arunansu Talukdar, Dept. of Medicine, Medical College, Kolkata.
- (vii) Dr. Jayanta Saha, Dept. of Cardiology, Medical College, Kolkata.

Research Scholars:

- (i) Priyanka Bera, Senior Research Fellow, CSIR, Govt of India
- (ii) Samiul Alam, Asst professor, Heritage Institute of Technology, Kolkata
- (iii) Monalisa Singha Roy, DST -Women Scientist, Govt. of India.
- (iv) Soumyak Chandra, Senior Research Fellow, Senior Research Assistant, Centre of Excellence in Systems Biology & Biomedical Engg., University of Calcutta.
- (v) Biplab Roy, Associate Professor, Dept of ECE, NITMAS, West Bengal.
- (vi) Anumitra Mitra, Research Scholar, Electrical Engineering, Jadavpur University.
