## **Communique — University of Calcutta**

University of Calcutta has taken the following steps to assist the anti- Corona struggle in the State.

1. University's Chemistry Department is using its manpower and apparatus to produce hand sanitizers in bulk.
2. University's Jute and Fibre Technology Department has initiated production of masks.

Both the aforesaid products will be used/ distributed in consultation with State Government.

3. University's Psychology and Applied Psychology Department will arrange psychological counselling for students in stress during the time of lockdown.

The above three initiatives are in addition to the financial contribution that the University has made to the State Emergency Fund, and the contributions that our teachers, officers, staff and students are also making to that Fund.
